

Control ALGAE this Summer...

With help from **Coptrol** & Aquatic Site Maintenance..

Approved
for use
with:

- Plants
- Animals
- Drinking water

Control ALGAE in Water with **Coptrol**—New Generation Algicide.

Coptrol offers a new approach in the control of algal blooms (free floating or filamentous algae) in:

- Lakes,
- Ponds,
- Dams,
- Drinking water supplies,
- Golf course ponds / lakes,
- Residential estates ornamental lakes / wetlands.

Coptrol algicide is purposely formulated for the safe and effective use in aquatic environments, it works in all types of water, hard or soft, salt or fresh, turbid or clear.

It will clean up existing algae, including blue green & prevent future growth, keeping water clear & bright.

- Environmentally Safe.
- Does not harm fish, livestock, plants, pastures or turf.
